

Energy performance certificate (EPC)

Unit 9 St James Business Park
Grimald Crag Court
Knaresborough
HG5 8QB

Energy rating

C

Valid until
18 May 2031

Certificate number
6613-0518-8326-3069-9529

Property type

D1 Non-residential Institutions - Education

Total floor area

633 square metres

Rules on letting this property

Properties can be let if they have an energy rating from A+ to E.

If a property has an energy rating of F or G, the landlord cannot grant a tenancy to new or existing tenants, unless an exemption has been registered.

From 1 April 2023, landlords will not be allowed to continue letting a non-domestic property on an existing lease if that property has an energy rating of F or G.

You can read [guidance for landlords on the regulations and exemptions](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/824018/Non-Dom_Private_Rented_Property_Minimum_Standard_-_Landlord_Guidance.pdf) (https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/824018/Non-Dom_Private_Rented_Property_Minimum_Standard_-_Landlord_Guidance.pdf).

Energy efficiency rating for this property

This property's current energy rating is C.

Properties are given a rating from A+ (most efficient) to G (least efficient).

Properties are also given a score. The larger the number, the more carbon dioxide (CO2) your property is likely to emit.

How this property compares to others

Properties similar to this one could have ratings:

If newly built

If typical of the existing stock

Recommendation report

Guidance on improving the energy performance of this property can be found in the [recommendation report \(/energy-certificate/7504-2421-0063-2017-5994\)](#).

Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.

Report number
7504-2421-0063-2017-5994

Valid until
18 May 2031

Energy rating and EPC

This property's current energy rating is C.

For more information on the property's energy performance, [see the EPC for this property \(/energy-certificate/6613-0518-8326-3069-9529\)](#).

Recommendations

Make these changes to improve the property's energy efficiency.

Recommended improvements are grouped by the estimated time it would take for the change to pay for itself. The assessor may also make additional recommendations.

Each recommendation is marked as low, medium or high. This shows the potential impact of the change on reducing the property's carbon emissions.

Changes that pay for themselves within 3 years

| Recommendation | Potential impact |
|--|------------------|
| In some spaces, the solar gain limit defined in the NCM is exceeded, which might cause overheating. Consider solar control measures such as the application of reflective coating or shading devices to windows. | Medium |

Changes that pay for themselves within 3 to 7 years

| Recommendation | Potential impact |
|---|------------------|
| Add time control to heating system. | Low |
| Add optimum start/stop to the heating system. | Low |

Changes that pay for themselves in more than 7 years

| Recommendation | Potential impact |
|---|------------------|
| The default heat generator efficiency is chosen. It is recommended that the heat generator system be investigated to gain an understanding of its efficiency and possible improvements. | Low |

| Recommendation | Potential impact |
|---|-------------------------|
| The default chiller efficiency is chosen. It is recommended that the chiller system be investigated to gain an understanding of its efficiency and possible improvements. | Low |
| Add weather compensation controls to heating system. | Low |
| Add local time control to heating system. | Low |
| Carry out a pressure test, identify and treat identified air leakage. Enter result in EPC calculation. | Low |
